BRIDGE PLUS SOUTH SUDAN

Organizational Profile

Executive Summary

Bridge Plus South Sudan is a national non-profit humanitarian and development organization committed to strengthening equitable primary health care, advancing mental health and psychosocial wellbeing, promoting disability inclusion and empowerment, and supporting climate change adaptation, environmental sustainability, and resilient livelihoods across South Sudan. Established by a group of volunteers, the organization responds to the interconnected challenges of limited access to quality health services, psychological distress, disability-related exclusion, climate vulnerability, and socio-economic hardship affecting vulnerable and crisis-affected populations.

Guided by its vision of an inclusive and climate-resilient South Sudan where every individual, including persons with disabilities, enjoys optimal wellbeing, Bridge Plus South Sudan implements community-driven, rights-based, and evidence-informed interventions that strengthen systems, empower communities, and promote dignity, resilience, and sustainable development.

Vision

Equitable Primary Health Care integrating Mental Health, disability inclusion, and climate resilience for a South Sudan where everyone enjoys optimal wellbeing.

Mission

"To empower communities across South Sudan, including people with disabilities, through equitable, integrated Primary Health Care that advances Mental Health, disability inclusion, and climate resilience for improved wellbeing."

Goal

To promote equitable and integrated Primary Health Care, Mental Health and psychosocial wellbeing for vulnerable communities across South Sudan.

Core Values

Inclusion and Participation

We ensure that all people, especially vulnerable groups and persons with disabilities, have meaningful opportunities to participate in decisions and activities that affect their lives.

Integrity

We uphold honesty, transparency, professionalism, and ethical conduct in all our actions and relationships.

Accountability

We are responsible to communities, donors, partners, and stakeholders, ensuring effective use of resources and measurable impact.

Equity

We promote fairness and equal access to opportunities, services, and resources while addressing systemic barriers.

Service

We are committed to compassionate, responsive, and high-quality service delivery.

Safeguarding

We maintain safe environments that protect children, vulnerable adults, persons with disabilities, staff, volunteers, and community members from harm and exploitation.

Strategic Objectives

Objective 1:

Promote Equitable, Integrated Primary Health Care, Mental Health and Psychosocial Wellbeing

Bridge Plus South Sudan seeks to improve equitable access to integrated, quality Primary Health Care by strengthening Mental Health and Psychosocial Support through health promotion, disease prevention, early identification, treatment, referral, and community-based interventions that enhance the wellbeing of vulnerable individuals and communities.

Objective 2: Promote Disability Rights, Inclusion, and Empowerment

The organization works to ensure persons with disabilities enjoy equal opportunities and participate fully in socio-economic life.

Objective 3: Promote Climate Change Adaptation, Environmental Sustainability, and Resilient Livelihoods

Bridge Plus South Sudan seeks to strengthen community resilience to climate change by promoting environmental sustainability, sustainable livelihoods, climate-smart practices, and disaster risk reduction, while enhancing the capacity of vulnerable communities to adapt to environmental shocks and improve their wellbeing.

Thematic Areas of Intervention

Thematic Area 1: Primary Health Care, Mental Health and Psychosocial Support (MHPSS)

Bridge Plus South Sudan is committed to strengthening equitable, integrated, and people-centered Primary Health Care as the foundation for improving the health and wellbeing of vulnerable individuals and communities. Recognizing that Mental Health is an essential component of primary health care, the organization promotes accessible, culturally appropriate, and community-based Mental Health and psychosocial support (MHPSS) services that are integrated across the continuum of care.

Key interventions include health promotion and disease prevention and integration of Mental Health services within Primary Health Care facilities. Through community engagement, outreach, and evidence-based interventions, Bridge Plus South Sudan seeks to improve equitable access to quality Primary Health Care and MHPSS services, enhancing resilience, recovery, and overall wellbeing among crisis-affected and underserved populations.

Thematic Area 2: Disability Inclusion and Empowerment

Bridge Plus South Sudan promotes the rights and dignity of persons with disabilities through inclusive programming and advocacy.

Key disability empowerment interventions include advancing disability rights through advocacy, legal empowerment, and rights awareness; promoting inclusive education by improving accessibility and strengthening the capacity of teachers and schools; enhancing economic independence through vocational skills development, entrepreneurship support, financial literacy, and savings groups; increasing access to assistive devices and technologies; and mainstreaming disability inclusion through accessibility audits, inclusive program design, and meaningful participation of persons with disabilities in community development processes.

Thematic Area 3: Climate Change, Environmental Sustainability, and Livelihoods

Bridge Plus South Sudan is committed to strengthening community resilience to climate change through integrated approaches that promote environmental sustainability, sustainable livelihoods, and disaster risk reduction. Recognizing the increasing impacts of climate change on health, food security, livelihoods, and community wellbeing, the organization supports locally led solutions that enable vulnerable communities to adapt, recover, and thrive.

Key interventions include promoting climate-smart and sustainable livelihood opportunities, community-based climate adaptation, natural resource management and environmental restoration, disaster risk reduction and preparedness, sustainable agriculture and food security initiatives, and community awareness on climate resilience and environmental stewardship. Bridge Plus South Sudan also strengthens community capacities to diversify livelihoods, improve household resilience, and protect natural resources through participatory planning, local leadership, and inclusive partnerships. These interventions contribute to resilient ecosystems, improved livelihoods, and sustainable development for vulnerable and crisis-affected communities across South Sudan.
